

ABOUT US

Safety equipment and expertise for demanding industrial sites

SafetyGear supplies PPE, fire protection and gas detection equipment, delivers HSE and emergency-response training, and manages industrial procurement — one accountable partner from specification to site. Serving Iraq and the wider Middle East.

SERVICES

Safety Equipment & PPE Supply	Head-to-toe PPE specified for the hazard, sized for your workforce and delivered with full documentation.
Fire Fighting & Fire Protection	Extinguishers, hose reels, detection and alarm, suppression components and emergency lighting for every type of facility.
HSE Training & Workplace Safety	Induction, awareness and competence courses that change behaviour on site — delivered in English or Arabic.
Emergency Response & Specialised Training	Fire, first aid, work-at-height, confined-space and chemical response training — clearly marked practical or awareness.
Industrial Safety & Environmental Equipment	Gas detection, emergency showers, spill control, barriers, signage and hazardous-material storage.
Industrial Procurement & Supply Chain	Sourcing, RFQ and tender support, bulk procurement, import coordination and MRO supply.
HSE Consulting, Audits & Compliance Support	Inspections, risk assessments, HSE procedures, audit support, incident investigation and contractor safety.
Inspection, Installation & Maintenance	PPE and equipment inspection, extinguisher servicing, alarm installation, gas detector calibration coordination and replacement programmes.

INDUSTRIES

Oil & Gas	Upstream fields, gathering stations, pipelines and depots where H ₂ S, flammable gas and heat are daily hazards.
Petrochemical & Chemical	Process plants handling corrosive, toxic and flammable materials.
Construction & Infrastructure	Building, roads and infrastructure projects with large, changing workforces.
Manufacturing & Heavy Industry	Plants and workshops with machinery, noise, dust and hot work.
Power & Utilities	Power generation, substations and water treatment facilities.
Logistics & Warehousing	Warehouses, ports and distribution centres with vehicle and handling risks.

Facilities Management

Commercial buildings, hospitals, hotels and campuses that must stay compliant and ready.

Mining & Quarrying

Extraction sites with dust, heavy equipment and remote operations.
